

CH-021 - Pre-Heating resistor

Product Code: CH-021

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

CH-021 Pre-Heating Resistor

Quartz heating is a type of radiant heating, commonly referred to as short-wave infrared heating. The tubes are manufactured from quartz glass (fused silica), which protect and support the heating coils. They provide efficient transmission of infra-red radiation, good resistance to chemical and contamination.

Heating coils are wound in various grades of iron-chrome-aluminium alloys to match the applications and operating conditions, and typically generate radiant emission in the short to medium wavelength range.

Heating resistor quartz 8x12x1130 1500w

Equipment Ref

812 Ref R2 - pre-heating
